SHOOTING AT EDGOTEN

Jim White, a Fifteen-Year-Old Boy Uses Pistol on Will Carter.

5 SHOTS WERE FIRED.

Boy Held Under \$200 Bond and Will Be Tried This Week.

Jim White, a boy about 15 years old, shot and wounded Will Carter, aged 23, a section hand on the Tennessee Central Railroad, at Edgoten, Saturday. One report is that Carter had imposed upon the boy, who secured a pistol and renewed the difficulty, shooting Carter in the arm and shoulder. The wound is slight. White gave himself up and was put under a \$200 bond by Esq. Walton Garrett. The trial will come up one day this week.

He was a son of the late Jim Henry White, of Lafayette, and a step-son of Will White, formerly of Newstead. White is operator in the Home Telephone office at Edgoten.

Much Appreciated Favors.

Mr. John W. Ford, of Church Hill, desires through the Kentuckian to thank all his friends for the many kindnesses shown him since the fire which destroyed his residence and much of its contents. Words are inadequate to express his appreciation of same.

THREE LICENSES ARE ISSUED

Matrimonial Market Getting Rather Brisk After Lull of Two Weeks.

ONE TENNESSEE BRIDE.

Two Weddings Occurred And the Third is Scheduled for Tomorrow.

A midnight marriage occurred at police headquarters Saturday night, the contracting parties being George May, of Pembroke, and Miss Annie Gwiley, of Robertson county, Tenn. The young people arrived in the city on the L. & N. accommodation and went directly to the county clerk's office, but found it closed. They then repaired to police headquarters for the purpose obtaining information concerning the matter of securing a marriage license. An officer telephoned Deputy Clerk Wicks and he was soon on hand. The next thing in order was to secure the service of a minister, and, although the hour was quite late, the Rev. A. C. Biddle consented to come down town and tie the nuptial knot, after which the couple departed. Mr. and Mrs. May will reside near Pembroke.

Hopson-Colley.

W. H. Hopson and Miss Sestie Colley, well known and popular young people of the Hawkins neighborhood, were united in marriage at the home of the bride Sunday night. The Rev. Joel Hopson, of the Paducah, Ky., Aug. 10.—After the Kentucky convention of the Farmers' Union adjourned at 3 o'clock Saturday, the delegates marched down the length of Broadway with their county banners and dispersed at the foot of the street. The executive committee was in session all day, but gave out none of its proceedings. It is probable that Secretary Barnett will have his headquarters toward the center of the State, where we will be in better touch with central and eastern sections, having secured a good foothold in the west. Twenty-two counties were represented at this convention.

THE UNION IN- STALLS OFFICERS

Organization Firmly Established in Kentucky.

22 COUNTIES IN IT.

Headquarters of the President to be Near Center of State.

At the morning session the following State officers were installed: President, Robert Johnson, Tolu, Crittendon county; vice president, A. L. Wilson, Hickory Grove, Graves county; Champplain, W. W. Moore, Paducah; conductor, J. L. Robertson, Mayfield; secretary-treasurer, R. L. Barnett, Paducah; doorkeeper, J. C. Denton; executive committee, Like Thomas, Folsomdale; Sam P. Jones, Cunningham; John Grady, Calvert City; T. B. Latta, Fulton, M. B. Tapp, Woodville.

It was announced that a meeting of State presidents will be held at Memphis, August 26. There are twenty-six States in the organization, principally in the West and South. The organization, repeatedly went on record as being opposed to night riding and lawlessness.

Chapman-Weaver. A marriage license was issued James A. Chapman and Miss Annie F. Weaver yesterday. The young people live near Lafayette and the wedding is scheduled for tomorrow. Rev. Archer, of Lafayette, will officiate.

THREE WINNERS

In Messenger's Popular Lady Contest.

The Messenger's popular lady contest closed Saturday night. There were three winners, as follows: District No. 1, Miss Maida Younglove, daughter of Mr. Geo. W. Younglove, of this city, who received 17,994 votes; district No. 2, Miss Laurie Thurmond, daughter of Mr. John C. Thurmond, of Gracely, who got 12,959 votes; and district No. 3, Miss Annie Bruff, daughter of Mrs. Jas. Bruff, of this city, who had 10,610 votes.

Capt. E. W. Clark, business manager of the Messenger, accompanied by Mrs. Clark as chaperon, will go with the party on the free trip to Niagara Falls, Canada and other points. The party will probably leave Friday.

SKULL CRUSHED.

Colored Child Killed By Cars Near Crossing.

Ora Bradshaw, an 8-year-old colored girl, was killed by the Dixie Flyer near the Clarksville crossing Sunday afternoon about 5:40 o'clock.

The child, in company with several other children, was playing near the track and when the train was seen approaching they attempted to cross the railroad. All cleared the track but the Bradshaw girl, who was struck on the forehead by the pilot and instantly killed. An instant

CITY COUNCIL HOLDS MEETING

But Fails to Get Through Volume of Business On Hand.

MEETS FRIDAY NIGHT

To Consider Sanitary Condition of the City on Complaint of Health Board.

The city council met in regular session Friday night with all the members present. The usual monthly reports were received and filed and the budget of accounts allowed, amounting to \$535.27. Also the City Light Co's bill for July was paid, \$536.66.

The colored Baptist church was given permission to sell refreshments during the state association this week, without license.

The condition of the streets was given considerable attention and the work for August was outlined in a report from the street committee.

Central avenue, from the railroad to Belmont, is to be repaired and some general repairs will be made. The street sweeper is to be started up and the streets given a thorough cleaning.

Half a dozen city maps for the different departments were ordered to be framed.

An ordinance was passed prohibiting the keeping of more than five pounds of dynamite in any business house in the fire limits. All explosives will be required to be kept in a magazine in some isolated place. One or two pavement ordinances were given their first passage.

The principal matter up was the complaint of Dr. J. B. Jackson, county health officer, and Dr. R. L. Woodward, city health officer, that Little River was being polluted by sewers from private sewers until the stream was a menace to health. The Board of Health has given notice that steps must be taken to abate the nuisance within 20 days, or prosecution will follow. This subject, in all its phases will be considered at an adjourned meeting next Friday night.

Senses of Insects.

Insects guide themselves in flight at most entirely and on the ground partly by means of their faceted eyes. The antennae and the buccal sensory organs can help in aerial steering. Insects perceive the motion of objects particularly well—i. e., the displacements of visual images relatively to the compound eye. They therefore see better when on the wing than at rest, for during flight the image of immobile objects is displaced relatively to the eye.

Insects distinguish the contours and forms of objects only more or less distinctly.

Insects appreciate the direction and distance of objects very clearly during flight by the aid of their compound eyes. They can also appreciate, even when at rest, the distance of immobile objects.

Certain insects (bees, bumblebees) distinguish color clearly and recognize colors better than forms. Among others (wasps) the perception of color appears, on the contrary, to be very rudimentary.—"Senses of Insects."

The Japs as Jokers.

In the days of the second empire Baron Gros was sent to Japan to demand the opening of certain ports to French commerce. Among the rest he named to the Japanese ministers a certain city. The Japanese functionaries smiled so broadly when he preferred the request that the French ambassador asked them to tell him what gave them so much amusement, but instead of answering the Japanese ministers said:

"We will open the port in question, my lord, if France in her turn will open a certain port to us."

"What port is that?" asked the Frenchman.

"The port of Liverpool."

"But, your excellencies," laughing, "Liverpool is not a French port, but an English one."

"Yes," answered the Japanese, "and the port you named is not in Japan, but in Korea."

The French ambassador was compelled to admit that the joke was against him.—London Answers.

The Submarine Crew.

Not until you have gone down in a submarine and seen the crew at work can you say you have seen the limit to which it is possible to drill human creatures. No crack company of a regiment, no fire company in any of our big cities, not even the engine force on a man-of-war, is under such discipline as the crew of a submarine. The navy department and the men themselves realize that months are required before even the most capable group of men can be made to work as a unit, perfect as clockwork. There is no time to "break in" crews when once war is declared, and for this reason the submarine service is continually and incessantly in war practice. Practice runs in the ordinary sense do not exist. Each time the boat stands out to sea she goes as if for business, the crew see being exactly like those that would be enacted were the vessel bent upon actually sinking an enemy.—St. Nicholas.

Two Sides.

She—If a man loves his wife as much as she loves him he will stop wasting his money on cigars if she asks him. He—Yes, but if his wife loves him as much as he ought to love a man who loves her enough to stop if she asks him she won't ask him.—Puck.

DANGER IN DELAY

Kidney Diseases Are Too Dangerous for Hopkinsville People to Neglect.

The great danger of kidney troubles is that they get a firm hold before the sufferer recognizes them. Health is gradually undermined. Backache, headache, nervousness, lameness, soreness, lumbago, urinary troubles, dropsy, diabetes and Bright's disease follow in mercurial succession. Don't neglect your kidneys. Cure the kidneys with the certain and safe remedy, Doan's Kidney Pills, which has cured people right here in Hopkinsville.

Miss L. A. Hester, 826 North Main street, Hopkinsville, Ky., says:

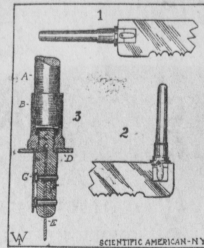

"I honestly believe that there is little need of any one suffering the torture of backache when such an effective remedy as Doan's Kidney Pills can be procured at L. A. Johnson's drug store. The prompt and thorough relief which followed their use in my case has given me abiding faith in their merits. In the summer of 1903, I was suffering greatly from soreness and lameness across the small of my back and other difficulties arising from a weakness of the kidneys. Two boxes of Doan's Kidney Pills was all I required to free me from the distressing pain in my back and restore my kidneys to a good healthy condition. I recommended Doan's Kidney Pills at that time and during the four years which have elapsed, I still have the same good opinion of the remedy."

IMPROVED SAW HANDLE.

May Be Adjusted at Right Angles or in Alignment.

In the accompanying cut is shown a handle, particularly adapted for use with a saw, though it will be evident that it may be used for other tools as well. The handle is so arranged that it may be adjusted at right angles to or in alignment with the saw blade. This adjustment permits the saw to be carried without difficulty through the woods, because the handle may be so set as not to project beyond the main

ADJUSTABLE SAW HANDLE.

body of the saw. The details of the handle are best shown in Fig. 3. The handle proper is indicated at A and fits into a socket, B. The lower end of the socket is threaded to receive a member, C. The latter is slotted, and in the slot the saw blade E is fitted. Between the member C and the socket piece B a washer, D, is mounted, and the socket piece B is firmly screwed on the member C it presses the washer D into engagement with the back of the saw blade.

The saw blade is secured to the member C by means of a pair of pins, F, which pass transversely through this member and the usual holes provided in the saw blade. The pins are prevented from slipping out by a retaining piece, G, which is pivoted to swing over them. The usual holes in the saw blade are placed at different distances from the edge in various makes; but, as the slot in the retaining member C is quite deep, these differences will not prevent the handle from being secured to any blade. Figs. 1 and 2 show how the handle may be adjusted in alignment and at right angles, respectively, to the saw blade. The inventors of this handle are Messrs. E. A. Patterson and E. F. Dickinson, Morgan City, La.

LARGEST LACE MACHINE.

Invention For Effecting Economy and Greater Production.

Consult Frank W. Mahin reports that the new machine he has just built in Nottingham, England.

The machine contains many important improvements designed to counteract the influence of a foreign machine of similar character which has proved a serious competitor to the usual type of Nottingham lace machines. The new machine is forty-one feet long and produces lace 200 inches wide. It is intended chiefly for heavy torcons and mallet lace.

A special feature of the machine is the absence of vibration, a defect fatal to many lace machines. This improvement, which is deemed remarkable because of the machine's size, is produced by special gearing and by an arrangement of concussion springs instead of the ordinary elastic or spiral springs. Other improvements simplify and make easy the operation of putting in threads to replace broken ones and of taking the carriages out of the machine—operations slow and laborious in many machines and sometimes damaging the lace that is being woven. The new machine is so satisfactory that the construction of several more of the same kind has begun.

Tuberculous Milk and Children. William Leland Stowell of New York describes the results of the feeding of the children of some of the wards of the City Hospital for Children on Ward's Island on milk from a city herd that was afterward ascertained to be tuberculous. The herd was tested, and all the animals it had to be killed, as the test showed some degree of tuberculous infection in all. All the children who had been fed on this milk were tested by the ophthalmic reaction, seventy-seven in all. Of these nineteen reacted, thirteen were surgical cases of tuberculosis, and three were not suspected of tuberculosis. The author concludes that fresh, clean milk is more wholesome than pasteurized milk. The danger of infection from tuberculous milk is very slight. Less than 10 per cent mortality in the whole hospital was due to tuberculosis.—Medical Record.

High Temperatures.

High temperatures now play an important part in our daily work, and it is interesting to note the following actual temperatures of familiar objects and operations determined by a new optical pyrometer: Porcelain furnace, 2,498 degrees F.; glass furnace, 2,502 degrees; open hearth steel, 2,795 degrees; melted platinum, 3,235 degrees; incandescent lamp, 3,272 degrees; arc lamp, 7,410 degrees; the sun, 13,712 degrees.

THE STATE UNIVERSITY

LEXINGTON, KENTUCKY.

The State University, Lexington, Kentucky, offers the following courses, namely, Agricultural, Mechanical Engineering, Civil Engineering, Electrical Engineering, Mining Engineering, Classical and seven Scientific courses each of which extends over four years and leads to a Bachelor's degree; also a department of Law and a Department of Education, which last has been established instead of the Normal School. Persons who enter this department prepare for advanced work in pedagogy and are granted a Bachelor's degree in this subject when completed. The Academy for preparatory instruction is retained.

County apprentices receive free tuition, privilege of residence in the dormitories, fuel and light, traveling expenses, if they remain ten consecutive months, or one collegiate year.

The laboratories and museum are large, well equipped, comprehensive and modern. Military Science is fully provided for as required by Congress.

The graduates in the several courses of study readily find employment with liberal remuneration. The total number of matriculates for last year was 1078. Each department has a specialist at its head, with the necessary number of assistants.

Young women find an excellent home, with board and lodging, in Patterson Hall, which is well equipped with all the modern conveniences, bath-room, hall for physical culture, at \$3.00 per week. All courses of study in the University are open to women on identical conditions with those applying to males.

The completion of the Agricultural, Mining Engineering Laboratory and Education buildings afford ample and commodious quarters for these departments, which are rapidly increasing in the number of matriculates.

FIGHTING THE SEA.

The Amphibious Dutchman and Holland's Battle With Water.

Holland's existence is one long fight against the inroads of the sea. Much of the country is below the ocean level and has only been rescued from the waves by the colossal system of dikes. The Dutchman has grown so used to the water that oftentimes he is nearly an amphibious animal. Fifty thousand Hollanders live in barges on the canals. Even in winter, when the canals are frozen, these people stick to their boats, for they have no other home. The canal houses used to be towed by dogs, but now this work is done by men and women, each family towing its own boat.

Dutchmen are among the most expert navigators in the world. In utter indifference to the natural antagonism between land and water and in ability to make either contribute to their necessities, they have even excelled the English. At the relief of Leyden the prince of Orange, by breaking down the dikes and letting in the sea, made navigation feasible on a tract of ground which had formerly been dry land, and the strange spectacle was seen of the Dutch warships floating among the tops of orchards and past the chimneys of submerged houses.

When Holland was invaded by France another prince of Orange formed the plan of abandoning the country entirely and conveying all its population to the East Indies. Holland has always relied on the ocean as a security against hostile powers. In our own time a member of the Dutch royal family attended a great review of Prussian troops. Regiment after regiment of strapping fellows marched by, but all the Dutchman would say was, "Not so tall enough." Finally a grenadier regiment of unusually tall men came into the field. "Every one of these soldiers is over six feet high," remarked a Prussian officer to the Hollander. "Surely you will admit these are tall enough?" The Dutchman shook his head. "We can flood my country with ten feet of water," he observed. Doubtless the Prussian took the hint.—Buffalo Times.

The Umbrella.

The first umbrella ever seen in the streets of London was carried by the philanthropist James Hanway, who died in 1786. For many years after the introduction of umbrellas a man could not be seen carrying one without being mocked for his effeminacy, particularly when passing a hackney coach stand. The drivers of these vehicles regarded the umbrella in the light of a rival. For a long time coffee houses and inns were accustomed to keep a single umbrella of great magnitude for the purpose of shielding customers from the rain as they passed from the door to their carriages. This monstrous structure was carried by a waiter. It was not until about the year 1800 that the use of the umbrella became so general throughout Europe and America that a man could carry one without attracting the attention of passersby to a disagreeable extent. In Spain and Italy the article was first domesticated. France adopted it next and lastly England.—Spare Moments.

What Wagner Recalled.

A hard headed old manufacturer who made his fortune as he expresses it, "with his coat on," was induced by his creditors to accompany them to a Wagner concert, the first he had ever attended. The next day he happened to meet an acquaintance who had seen him the night before, who asked:

"I suppose you enjoyed the concert last night, Mr. Smith?"
"Yes. It took me back to the days of my youth," the old man said with a reminiscent sigh.
"Ah, summer days in the country, girl in a lawn dress, birds singing and all that?"
"No, the days when I worked in a boiler shop in Scranton,"—Philadelphia Ledger.

London at Night.

There are few views which make a stronger appeal to the imagination than that of the Thames at night, seen from some point that gives a view of the historic towers of Westminster rising into the purple sky, and the long frontage of giant hotels, illuminated from basement to attic. The ugly features that crude daylight reveals are forgotten and the hum and bustle of the vast city reach one softened and poetized. It is the London of Whistler and Turner—an aspect of their own city of which many Londoners know nothing.—Home Messenger.

Unhappy Illustration.

"Johnny," said a teacher to a grocery man's six-year-old, "a lie can be acted as well as told. Now, if your father would put sand in his sugar and sell it he would be acting a lie and doing very wrong."
"That's what mother told him," said Johnny impetuously, "and he said he didn't care."

who insulted him because he refused
to pool his tobacco. The Governor
says Bracken county is so dominated
by night riders that Lee could not
get a fair trial and that the county
Judge and county attorney are in
sympathy with them and have done
nothing in four months of flagrant
disorder to restore peace or preserve
order or protect the rights or lib-

Coudon Denies.

Replying to the charge that the
trust is refusing to buy tobacco,
Martin J. Coudon, president of the
American Snuff Co., says:

"We are buying now, and have al-
ways bought, tobacco absolutely in-
dependently and with no connection,
understanding, co-operation or
agreement between us and any other
buyer of tobacco. The reduction in
our purchases at the present time
is not a part of any plan to do any-
thing to embarrass The Dark To-
bacco Planters' organization, but it
is simply and only due to the fact
that we have already on hand a large
surplus of tobacco suitable for our
needs than we usually have, and as
large a surplus as our business war-
rants us in carrying. This condition
naturally diminishes our purchases,
for the time being, and our action in
this respect has been without any
agreement, understanding, co-opera-
tion or consultation with any other
buyer of tobacco whatsoever."

Keep the Chin Well Up.

One physical culture instructor in
Boston, who is having great success
in teaching round-shouldered girls
to stand and walk erect, says the
whole secret is in the way the head
is held.

"Throw up your chin," is her
rule. This throws the head upward
and backward and the shoulders will
naturally settle backward and in
their true position.

Those who stoop in walking gen-
erally look downward. The proper
way is to look straight ahead upon
the same level with your eyes, or, if
you are inclined to stoop, until that
tendency is overcome, look rather
above than below the level.

Mountaineers are said to be as
"straight as an arrow," and the reason
is because they are obliged to
look upward so much. It is simply
impossible to stoop in walking if you
heed and practice this rule. You
will notice that all round-shouldered
persons carry the chin near the

**A GOOD REPUTATION
"IS A FAIR ESTATE."**

This Maxim is Well Applied
to the Sun Brothers' Great-
er Progressive Shows, That
Will Appear Here Aug. 20.
Many New Features Will
Be Exhibited.

The value of a good name as a
trademark in winning the confidence
and esteem of the public was never
better exemplified than in the case
of the Sun Brothers, Greater Pro-
gressive Shows this season. Where-
ever they have cast their tents and
caravans, immense crowds have been
in attendance. The show is bigger
and better than ever. The arenic
features being enlarged and the animal
department augmented by di-
vers new and strange beasts from
distant lands. The Sun Brothers' performance is always clean and in-
teresting, and cannot fail to be in-
structive to every one.

For the 1908 tour will be found at
each performance, the marvelous
Atlas Troupe, a company of eight of
the very greatest acrobats that ever
appeared before the public. These
exponents of acrobaticism, present a
surprising series of entirely new and
original feats, requiring strength,
athletic skill and acrobatic agility.
They execute with astonishing ease
and grace the most daring, difficult
and thrilling acrobatic acts imagin-
able. It cannot truthfully be said
that the Atlas Troupe stand without
peers in the arenic firmament.

Besides this great act, there will
appear, a pick of the world's output
champions of every class. The roster
of names includes the La Pasque
Troupe, Francis J. Boyle & Com-
pany, the Lindsay Troupe, Harvey
and Adams, the Avalon Troupe, E. Kirke
Adams and Company, Miss Clorine
Wenzell, Miss Josephine, Miss Belle
Young, M. Cahill, Orion, Fred Kenno,
Sisters Ortana, Frederic Wright,
Theo. Arthur, A. C. Mullens, Jack
Young, William O'Dale, Frank F.
LaVell, D. H. Gillespie, Miss Gilles-
pie, Walter and Minnie Ashborn. All
of these people will appear at each
exhibition, and they are among the
best performers, that can possibly
be engaged.

In the morning at 11.30 o'clock,
there will be offered on a magnifi-
cent plaza erected in front of the
main entrance, a series of extraor-
dinary free exhibitions. It is an-
nounced that they will be best out-
door fetes before given to the public
gratuitously.

The doors for the "Main Top"
performance will be opened at one
o'clock, and the Matinee will start
promptly at two o'clock. At night
time the programme will start at
eight o'clock and the doors will be
open at seven o'clock.

the State is not regarding him with
much respect.

PROVING HIMSELF.

Fest of a Pioneer Who Was Hale in His Old Age.

It is a wise man who proves his words before he speaks them. A story of an old Pennsylvania settler shows shrewdness in this direction as Gabriel Schuler, a pioneer who was hale in his old age.

One day Schuler broke in upon a company of farmers who were gathered in a workshop. The old man carried an ax on his shoulder.

"Let some one turn the grindstone for me," he said.

For a long time he sharpened the instrument, with the greatest solemnity. Some present thought he had lost his senses. Finally he shouldered the ax and said:

"The farmers thought that this summons might mean that an attack was to be made on the Indians, and they asked:

"Shall we use arms?"

"Do as you please," replied Schuler.

Each man seized his rifle and followed the old settler. He led them to an open place in the woods.

"Now," said Schuler, stopping, "let each go into the woods and select a fine, large tree. When you hear my trumpet, return."

The men, wondering, did as they were bid. When the trumpet blew they gathered once more about Schuler. The sage with his light-colored eyes, examined each tree selected.

"Many of them are very fine," he pronounced, "but none equals this oak."

So it was. He had picked out the finest. He threw off his hat and bowed to it. When he had bowed halfway through he changed his ax from his right hand to his left and went on without changing position or saying a word. In an hour he had cut way through, and the tree fell. Mounting the stump, Schuler addressed the farmers:

"Today I am a hundred years old, and I would bear evidence of my strength. I would like to have you promise that the tree shall stay as it fell."

The old man's request was granted, and the prostrate oak remained for many years to be a monument to the strength of the century old Pennsylvanian.

Schuler lived nearly ten years after this incident.—Youth's Companion.

No Need to Worry.

Mrs. Smith, on retiring to rest the other night, heard her husband pacing up and down his dressing room in an evidently perturbed state of mind.

"Jack," she called out, "aren't you coming to bed?"

"No," was the curt reply.

Awaking after her first sleep to find Mr. Smith still pacing up and down like a caged animal, she called out, "Jack, what is the matter?"

"Matter enough," replied her husband in a despondent voice. "I've got that bill of Tom Jones' coming due tomorrow for \$500, and I have not a farthing toward it!"

"You stupid fellow! Come to bed at once! It's Jones who ought to be waking up and down, not you!"

The Types of Cats.

There are a number of classes of Persian cats, and the difference between them being purely arbitrary and based on the color of the fur. The most beautiful of all the Persians is the pure white. They are, however, very hard to keep clean, and a dirty white cat is certainly anything but an ornament about one's rooms. It is unfortunate that many white cats are deaf, so when one is making a purchase of a cat that color it is a wise precaution to test the hearing. Another failing which white cats have, in common with all the colored cats, is that their constitutions are not so vigorous as those of the dark haired cats.—Suburban Life.

The Caddie's Patriotism.

Within limits the patriotism of caddies for their own links is to be admired, but in the following story, told by Mr. Sidney Fry, it seems to be carried a little too far:

At Romford, when the Essex ladies were playing against the ladies from Hampshire, one of the home team's caddies made a very high tee for his employer to play from. After the lady had made a bad drive she said to her caddie, "If you make such high tees Hampshire will beat us."

The caddie replied: "I beg your pardon, miss. I thought you was Hampshire."—London Globe.

Concealing His Ignorance.

In order not to expose his ignorance the schoolboy gave an ambiguous reply when asked in examination, "Which was the greater general, Caesar or Hannibal?" The boy answered, "If we consider who Caesar and Hannibal were and ask ourselves which of them was the greater, we must unhesitatingly answer in the affirmative."

BUSYBODIES VS. TRUTH.

Here Are The Facts—Judge For Yourself.

Bodybodies who see in success only falsity, who, without making an effort to inform themselves, blantly cry offense against honesty and truth—soon to forget that a sure against Dr. Pierce's well-known non-alcoholic family remedy is a star against the intelligence of thousands of coasting dishonest Americans who know they have been helped and cured by Dr. Pierce's Favorite Prescription. It is not a "patent medicine" in any sense—it is simply the favorite remedy which Dr. Pierce used in an extended practice for the treatment of the diseases peculiar to women.

Truth and Influence.

A name for honesty and square dealing is better than great riches. Fraud is a bubble that soon bursts. Dr. R. V. Pierce has always been known to speak the truth—his famous medicines are founded on the rock of public approval, and have thousands of truthful testimonials as to their ability to cure diseases for which they are recommended.

True Speaking.

No man ever lost a prospective customer through telling the truth. In the long run Dr. Pierce believes the truth will prevail and he is therefore not afraid to make public his formula.

Valuable Trade Secrets.

The ingredients of Dr. Pierce's Favorite Prescription are given to the public. He vindicates the excellence and harmless character of his "Prescription" by letting the world know just what they are taking when they use this reliable and enduring remedy for the diseases and illnesses peculiar to women. These ingredients are combined in just the right proportion to make an infallible remedy, without the use of a particle of alcohol, and are as follows: Golden Seal root, Black Cohosh root, Unicorn root, Blue Cohosh root, Lady's Slipper root, with chemically pure glycerine of proper strength for

extracting and preserving the active medicinal principles residing in the above native roots.

No Alcohol Used. Dr. Pierce never believed it necessary or advisable to use alcohol in the preparation of either his "Favorite Prescription" for weak women, or his "Golden Medical Discovery," the well-known alternative tonic, which is so largely used as a remedy for indigestion, torpid liver, bad blood and kindred ailments. Over forty years ago, he discovered that chemically pure glycerine is a far better solvent of most of the active principles residing in our native medicinal plants when used as a proper and sustained temperature than is alcohol; and, furthermore, he found that a glyceric extract kept much better than an alcoholic one, and that the glycerine possessed intrinsic remedial value, being demulcent, nutritive and an effective anti-ferment. Although costing somewhat more, Dr. Pierce prescribes that glyceric medicinal extracts will, for the most distant future, largely replace alcoholic ones so generally prescribed by physicians and put out by proprietary or "patent medicine" manufacturers, as being more efficient and entirely free from the serious objection of making inquiries when used in lingering or chronic cases, where a somewhat protracted use of medicine is necessary to matter how good or well adapted to the case it may be in order to obtain permanent results.

Dr. Pierce's "Favorite Prescription" is not quite laxative enough, as in obtaining constipation, the little, pleasant, sugar-coated Pellets should be taken to aid the "Prescription." One or two for a laxative, to four for a cathartic. They also have been known to cure many bad cases of stomach trouble, dyspepsia and indigestion. They act on the liver and regulate the bowels. Put up in glass vials, corked, therefore, always fresh and reliable. Pleasant Pellets.

LIGHTEST SALES LAST WEEK.

Tobacco Sold On the Local
Market Brought Good
Prices, However.

QUOTATIONS ARE FIRM.

Growing Crop Conditions
More Favorable Since Re-
cent Heavy Rains.

The sales on the loose tobacco market the past week were light. The salesman for the association reports sales of 28 hogsheds, the smallest sale for one whole week this season. Prices, however, were firm, as the following quotations show:

Lugs \$7 to \$10, and leaf, \$10.50 to \$13. Association receipts for the week were nine hogsheds.

The Society of Equity also reports a quiet week, with small sales, but the tobacco disposed of brought fair prices.

The recent rains have proven a great benefit to the growing crop and the weed is now growing right along. In some sections tobacco will be ready for the knife in about ten days, but much of that transplanted later will not be ripe until September. Some very late planting cannot be cut until October. There has been such an improvement in the crop situation since the ground was well soaked with water that indications now point to a much better yield than was expected some weeks ago.

TWO GAMES

Dropped By Draughton Team,
Nashville--Other Con-
tests.

The first and second ball games of the series of three, played at Mercer Park, between the local nine and the Draughton team, of Nashville, resulted in a victory for Hopkinsville. In the first contest the score was 4 to 2 in favor of the locals and in the second game the visitors lost by a score of 5 to 4. The third game of the series was played here yesterday afternoon, but the contest had not been finished when our forms closed.

Several games are scheduled for this place during the next ten days. The first series will be between the locals and the Fox Ridge team, Nashville. The date has not been fixed, but it is likely that this team will be here the latter part of the week. Next in order will be the Madisonville aggregation, then the Morganfield team, and later the Princeton nine will play the local team.

RAISING PRICES

Farmers Satisfied and Will
Try to Prevent Action of
Board.

Harrodsburg, Ky., Aug. 10.—Opinion is growing against raising the prices to the fifteen-twenty to twenty-five cents at the Winchester meeting. The Mercer County Board of Control will discuss the matter at a meeting to-day, and it is certain that the growers will take a stand against the raise.

The farmers say that fifteen-twenty is plenty, and that if they attempt to raise, the tobacco they have already disposed of may be turned back on them.

Other counties agree with Mercer, and it is no more likely that the raise will pass at Winchester than that the no-crop 1909 movement will carry. The farmers in this region say that they do not want to exceed moderation in their demands.

N. N. Richardson has filed suit against the L. & N. railroad company for \$5,000 damages. He alleges that while he was in the employ of defendant company as section hand, at work near Mannington, about a year ago, operating a scraper, he was injured as a direct result of the gross negligence of the defendant in failing and refusing to furnish the plaintiff a scraper in a reasonable safe condition for dumping and to have it properly loaded for said work.

The action was brought at Madisonville and will be tried at the next term of the Hopkins Circuit court.

FIFTY YEARS AGO.

Frost Which Killed Tobacco
and Brought Riches to
Paducahans.

Fifty years ago this morning there was a very heavy frost throughout this section, and which killed all the growing tobacco in Kentucky and Tennessee. The fact of the killing frost was watched by Watts, Given & Co., brokers and bankers, of this city, and before sunrise that morning they had closed a deal for all the tobacco in New York City at a nominal price, most all the precious crops at that time having accumulated there. The firm made an immense fortune out of the deal.—Paducah News-Democrat, Aug. 9.
